

Case Study

All Glass Transparent Doors Provide the Finishing Touch

Leading manufacturer GDUK Door Solutions, has supplied and installed fully glazed automatic sliding doors for Kingsgate House, an office redevelopment in Stockport.

Working with local fabricators, GDUK installed three sets of elegant all glass bi-parting sliding door systems which integrated seamlessly with the modern glass facade.

Two sets of Gilgen all glass SL35 sliding door systems were installed in the front entrance. Arranged in succession, the outer door closes before the second set opens aiding climate control within the lobby area.

A further SL35 bi-parting door was installed to the rear entrance. GDUK project management liaised very closely with the fabricators to ensure the the new glass facade and entrance doors interconnected seamlessly

The technologically advanced SL drive system incorporates advanced CANbus technology to ensure extremely safe, reliable contact free access. The CANbus, unique to Gilgen, continually checks all door safety devices enabling immediate fault recognition.

GDUK Door Solutions has extensive experience in the design, manufacture and installation of a leading range of commercial and industrial door systems. GDUK Door Solutions also offers a nationwide repair and maintenance service. The company is a member of the Automatic Door Suppliers Association (ADSA) and the DHF
